

Review MeetMe

MeetMe

MeetMe is a free site halfway between social networking and dating sites. With its geolocation system you can find near you a lot of people with whom you share the same interests and you can exchange photos, videos and even chat with them privately

MeetMe is an entertainment and dating social network that is causing a sensation among young people. Due to the need that people have to communicate, every day more applications are added to help meet new people and discover thousands of people from all over the world very similar to you. Formerly known as MyYearbook, it was originally created to meet people with similar interests, it has millions of active users who find a new friend or the love of their life every day.

MeetMe offers its users the ability to chat, send gifts, photos and videos. The application can be used on a PC or phone and is compatible with **Android** and **iOS**. It requires you to register and **download for free**.

Once you register, you will see that your suggestions will be personalized through different filters. The mobile version offers many more communication options than the desktop version, it is on your phone that you can make your time on the site more exciting. In the form of riddles, every time someone likes one of your photos you have to guess who is the one who did it, this type of game is what **MeetMe** offers and what will increase the interest of young people when be a game. This is the mechanic, through challenges you unlock profiles and thus you get to know new people who make up the community. Everything that happens to your profile will appear as statistics, so you can see who viewed your profile and who liked it.

You will generally find more people close to your location as it uses your device's geolocation. If you want to see a specific profile, simply click on it and you can know everything. Each user has a private chat room and personal photos. You can also interact by liking or commenting on these images and, most importantly, adding friends. It is highly recommended that you download the mobile version because it is much more up-to-date than the web.

Like the Tinder app, it also has the **Quick Select** feature by dragging your finger on the screen. Another interesting addition is **Secret Admirer**, where you get discreet advice from others, but need to know who is advising you. **MeetMe** is basically a chat where you can meet other individuals, regardless of age, and using the interests that you have marked.

In Questions, you will get tips on how to start a conversation with an unknown user and, if they are interested, respond with advice to other members with the same questions as you. There are channels in the main navigation menu where you can see the live broadcast of other users.

The developers avoid unwanted annoyances and try to prevent members from breaking the standard rules by banning or banning them from the application, allowing everyone to access the site very simply and safely. You can delete your account at any time if you want to close it.

Because it is a cross between a social network and a dating site. On **MeetMe** you will find a place for a friendly chat or for new appointments. You do this by participating in the search for different topics, which are also organized into different categories such as art, music, news, tattoos, politics, religion, and many more. That sounds great, but you also have to be careful with the personal data we give, exposing ourselves to the risks posed by this type of platform.

Maybe you are new to the city and you don't have many friends yet, **MeetMe** brings you closer to other people in a

very easy way from your own mobile. Find people with the same desire and concern as you. This app is completely free but it also has a paid version, in it you will find exclusive features such as unlocking photos of users, knowing who saw your own images, removing ads or accumulating credits with which you can highlight your publications. Upgrading your account to use these paid features is fairly cheap compared to other sites. So don't waste your time and give this app a try.
