

Review Clash Royale

Clash Royale is a high-speed tower video game that puts players in two or four player games (1v1 or 2v2) where the goal is to destroy as many opposing towers. One of the most popular and free strategy games for mobile devices!

Clash Royale is a high-speed tower video game developed and published by Supercell. The game combines collectible card game elements, a defense tower, and an online multiplayer playing field and was released worldwide on March 2, 2016. Clash Royale achieved \$ 1 billion in revenue in less than a year.

The game positions players into two or four players (1v1 or 2v2), where the goal is to destroy as many rival towers as possible, with the destruction of the "King's Tower" as an immediate victory. After three minutes, if both players or both teams have the same number of crowns or none, the game automatically goes into overtime and the player who destroys the opponent's tower wins instantly. After overtime, equality comes. At the end of the 2018 update, the abandonment of a 2v2 teammate repeatedly caused the player to have a block, preventing him from playing 2v2 with occasional players for a fixed period of time.

In Clash Royale, players are ranked by the number of their trophies. Players match by earning experience (or king level) points by donating and upgrading cards. The highest possible level is level 13. The December 2018 update added star points for excessive experience when players reached level 13 and will award star points for previous remaining experience.

Trophies are won or lost in multiplayer battles. A player wins a battle by destroying more towers than the opponent (each destroyed tower is represented as a "crown") or by destroying the opponent's Royal Tower, resulting in a "crown of three" automatic. "victory (unless the King's Tower is destroyed by both players at the same time leading to a draw).

You can also collect cards in the game that are very different in type and category that you can exchange later. Participate in clans or create your own cards to play with colleagues and friends of up to 50 people. Clan wars are a really great thing as an opportunity after reaching a certain level.

Here is a trick:

- * Whenever you play Pekka against Tank in the Minor Deck, be sure to place Pekka in the corners and not behind your King Tower; otherwise it will be thrown away.
- * You can activate the King Tower with a Goblin Tornado while dealing 0 damage.
- * You can register the rounded dark prints of Plus Skeletons to keep your display a little longer.
- * If positioned correctly, you can completely counter a baby dragon with just a bunch of goblins.
- * You can cancel the fireball musket animation, which allows you to shoot copies of your furnace to contact it.
- * If your opponent decides to launch a medium mortar to protect his bubble, you can easily activate King Town with only skeletons.

Tips you must master to be the best when **downloading Clash Royale**

Consider your deck type. Basically there are 3 types of decks: fast, slow, and medium cycling. To master the game you have to know what type of deck to use, since if you play a fast cycle, you have to be constantly spamming, throwing the units and overwhelming your rival, when the opponent drops a tank or something very heavy you have to go to yet for their crowns; However, if you have a slow deck, you should play it differently.

Adjust your cycle so that the opponent does not catch you by surprise, according to the conditions of the game

Mount your push with patience if you are a heavy cycle and mount your fast push if you are a fast cycle.

Always use spells wisely if you have a tornado, especially try to activate your king's tower. Always keep in mind the unit that annoys you the most and start the spell with that unit.

Always try to have units of dance which is to use cards to force the opponent's spell.

If you see that your opponent has a counterchange the line, defend again and again, again and again, and at the last moment change the line.

You should not drag the units, you should not drag the cards on the screen but itch because you gain a lot of time so you only need to drag when it is a special card.

Pros	Cons
-A good proposal to play in a group and meet friends. - Each game is different. -Sympathetic characters -Keep updated	-Those who make purchases within the app may have an advantage. -The time between games can be high. -Getting cards and rewards can be tedious.
