

Review Fun Race 3D

Good Job Games

Fun Race 3D is a very simple and fun game. You must run down a catwalk without falling. A format that always catches a good number of players. Each game will present us with more and more complex obstacles that we will have to overcome. The app can be downloaded free of charge for Android and iOS

One of the most famous types of games for mobile phones and tablets is the one that proposes running, running and running. It's that simple. There are plenty of examples of this style of proposals that, no matter how simple its mechanics or objective, assures us hours and hours of fun. Fun Race 3D is that kind of delivery.

Fun Race 3D is a very fun game for mobile phones and is very popular with enthusiasts of simple, addictive and beautiful titles. It is similar to the renowned Run Race 3D because the signature in charge of both is Good Job Games which you will also remember if you played Hyperball, Swing Star or Color Bump 3D.

To **play Fun Race 3D**, all you have to do is go to your virtual application store since it can be **downloaded for free** from there. As it usually happens with this type of product, there will be ads, so be patient to see and remove them. But no matter, accessing the title of Good Job Games free of charge is a privilege. However, if you wish to remove the advertisements you will have the opportunity to make an in-app purchase to remove them.

By **downloading Fun Race 3D**, players must participate in an exciting race full of obstacles. For example, you can compete with another opponent, or dodge the objects that appear after the start of the journey that you must pass without being hit or thrown to the ground. The path that unfolds across the map is not very wide and you can fall into the water below. If an obstacle knocks you down, you will have some delay, but you will still have to try to overcome it.

This type of proposal between **games and applications** is reminiscent of famous television entertainment programs. This means that the user only has to concentrate on not being knocked down. You'll have to move wisely, and sometimes it's better to wait at the right time. When you finish your first race, you will see how this cute little player who looks like made of jelly begins to dance on the finish line. In the next challenge, you will have to go through some new obstacles that can spin in a circle or some hanging balls that will try to stop you.

In the next levels, you can increase the number of players in the race, for example there may be games of three. Each participant looks similar, but with different colors. We will have rotating bars and hammers as obstacles to overcome along the walkway.

Bonus Level Power gives you a chance to win the game if you take advantage of it correctly and go through the objects with the fewest kills possible. After finishing, you will receive extra points.

Our characters are very simple but friendly. With the coins and points that we receive for finishing the games, we can buy different colors, aspects and celebrations for when we reach the goal. It is possible to use a series of aspects for free, which are the colors red, yellow, green, blue and purple. If you are one of those who want to look the most beautiful as quickly as possible, here is a tip. You can look at the ads (which are really a lot) to get coins. A good outfit can cost around 2,500 coins, a celebration about 150 and change color another 150.

The way to play is very easy to do, simply by pressing the button, the colored man starts to run, while when you release it, our character will stop running. One of the **advantages of Fun Race 3D** is that its mechanics are very simple but competitive. While it's just about running and the character has few moves available, the challenge will be great. You must know when to accelerate, when to brake and be aware of what is the obstacle in front of you and

how is the one that follows it. You cannot lose your attention at any time.

The graphics of Fun Race 3D are acceptable if we consider that it is a **free app**. The water that surrounds the walkways through which we travel has a good effect and is pleasing to the eye. The movements of the figures are fluid. Regarding the sound aspect, it could be improved and developed somewhat more.

A simple proposal but one that will give you a few good hours of fun.

Pros	Cons
- Can be downloaded for free. - It's addictive. - Easy to play. - Simple and friendly characters.	- Lots of ads. - It can become repetitive. - The sound aspect is not well developed. - Difficulty too high at times.
