

Review Hitman Sniper

SQUARE ENIX Ltd

Hitman Sniper is one of the most popular action games on both the App Store and Google Play. In it you will become a hitman who will have to be as quiet and stealthy as possible. In the game, your task is to eliminate some targets and sometimes their guards too. You will receive some instructions using real-time voice commands

If we take a continuous look at the lists of most downloaded games, both from Google Play and from the App Store, we will find daily with several games that do not move from the top positions. One of them is **Hitman Sniper**, which despite being available for some years, is still one of the most popular action games and has a huge legion of followers.

Despite the passage of time, and with few exceptions, it is not a free download game, it has been able to adapt to new times and improve, not only in graphics and options, but also incorporating new missions.

In this game we put ourselves in the shoes of Agent 47, with whom we will have to carry out different missions being a murderous silence. If you don't manage to be silent and you are discovered the mission can go to waste. That yes, on the positive side is that you will always be equipped with a sniper rifle that will help you very much to shoot and kill without being seen by anyone.

Surely you are wondering if it is worth paying for what this game is worth, and without a doubt the answer is yes. Normally the price of the game is not too high, although we all have a bad habit of not wanting to pay for any game or application. In exchange we will have more than 150 different missions available, where we must get the best possible score, in order to progress through the game.

By **Downloading Hitman Sniper** the Hitman sniper is embodied in the Montenegrin Deployment Agent 47, who has been ICA to remove several high profile targets from an assembly in three adjacent houses. All targets are protected by security personnel who patrol the complexes. Throughout the game, Agent 47 is assisted by Diana, who provides critical feedback on goals and directives through audio communication.

The game is divided into multiple chapters and each chapter in turn has multiple missions. Each mission involves a primary directive that is to kill the target and several secondary directives that differ with each mission. For example, you may need to shoot a moving head shot at two guards, indirectly kill the guards while firing nearby electrical boards to electrify them, and so on.

As you continue to successfully complete missions, you continue to level up the leaderboard based on in-game experience points. The money you earn as a reward for successful missions can be used to buy better weapons and upgrades, as well as unlock special features and abilities.

Thanks to the support of Google Play Games, your progress is automatically saved in the cloud and synchronized with the Google account. You can also share game videos directly to your Facebook feed and through the playback service. Compete against friends and players from all over the world for the top positions in the leaderboard.

Hitman Sniper is a first person shooter **game** in which you eliminate targets by seeing them through the range of your weapon sniper. For targets that are far away, it is possible to zoom in. Once a lock is purchased, the weapon

can be unloaded by tapping within range or on a dedicated button, depending on which setting has been configured to zoom in and out is accomplished using standard pin gestures. It's best to finish secondary tasks first and then remove the primary target, because doing the bladder instantly triggers the removal of forty-seven sevens from the location in ten seconds.

Also, leaving secondary tasks unfinished causes the overall quest to fail and the reward is considerably more laser. As the game progresses, the missions become more difficult. This is especially true for all secondary goals that are sometimes quite difficult to achieve. Plus, you always have a 10-minute deadline to complete a mission, so that's a concern, too. The game also has a kind of puzzle feel to it because Agent 47 sometimes needs to find unique ways to eliminate targets.

Pros	Cons
- 'The fun is guaranteed if you like action games' - 'The price of the game is negligible if we compare it with the hours of fun it will offer us' - 'The graphics, the sound and the gameplay that Hitman Sniper offers us are absolutely spectacular ' - 'The enormous amount of missions it offers will make us enjoy the game for a long time '	- "Sometimes some of the missions are somewhat complicated and can give us more than a headache" - "The battery consumption is high" - "The missions are more or less repetitive" - "Violence in this game"
