

Review Mobile Legends

Moonton

Mobile Legends is a free download app developed by Moonton. The game brings all the adrenaline, strategy and excitement of the MOBA genre to mobile phones. Coordinate your strategy well with your teammates to earn gold and experience in this wonderful installment. Here it does not matter if you spend money or not but your skills

Mobile Legends is one of the great phenomena of MOBA-type games and applications. One of the most popular genres in the world. If you want to know what **playing Mobile Legends** is about, you are in the right place. A MOBA is an experience that consists of fighting a multiplayer battle or war online, usually 5 against 5.

You must kill the enemies of the opposing team as well as shoot the enemy tower. Because you must not only fight in battle and kill, but also destroy towers.

One of the **advantages of Mobile Legends** is that there are several types of roles, positions and types of characters. This will make each game different. One of them is the Tank, it is called like that because it is the one that has to go ahead of the team's fight, its duty is to take care of the first attack on the rival and absorb all the damage possible so that its companions do not receive it.

On the other hand, shooters are the heroes that are supposed to have the most physical damage and the goal is to kill them to weaken your opponent. They are the characters that can hurt the most.

Mages are very fragile, can't hit as quickly, and have skill damage. It is good that they are always accompanied. There is also the support role, who is in charge of helping and healing his allies.

The combatant role is the most balanced, they kill well and they can go quietly alone along a line and also go to the jungle.

The assassins are heroes with a lot of damage and mobility, they are the ones in charge of killing and making objectives at the beginning of the game. They are not very hard to take down since the toughest are the tanks.

Every time a team has numerical superiority, objectives can be set to gain experience. The Lord summons his minions and makes them stronger when he appears in the line most touched by the enemy. What you need to do is pull the lines forward or go behind the Lord.

Items that must be purchased at the start will mark much of what happens during battle. A good **trick or advice from Mobile Legends** is to copy the equipment of a global top since they surely have it more than proven and it is a luggage that will give good performance.

For starters you can start with Leyla an evil artillery that deals a good amount of damage.

In the upper left corner you can see the map which has the modality known as 3 lanes. You can go up, through the middle or take the path down. In this game, one character usually goes in the middle, two up and two down.

The proposal developed by Moonton is mostly about preparing the plays and strategies very carefully. You have to take the life of your enemies little by little. We will have to use skills or basic blows without risking much.

Mobile Legends can be **downloaded for free** on phones with Android and iOS operating systems. It also offers a variety of in-app purchases. As often happens in MOBA titles, the important thing here is dexterity, skill and how good your strategy is when attacking. The person who spends the most money on extra content does not necessarily win. The competition is very fair and balanced.

The speed at which it allows you to feel the adrenaline of this type of delivery is very good since you can find battles in just 10 seconds. Once you are on the field of play, the game lasts around 10 minutes. In addition, the controls to manage our characters are very simple and do not present any kind of difficulty when controlling them. It has a

movement control on the left and what refers to skills on the right.

For all fans of the popular computer genre, the chance to **download Mobile Legends for free** is a unique opportunity to carry out great battles with the best characters.

If you are a fan of battles of this type, you cannot miss the opportunity to experience the best of MOBAs on your mobile.

Pros	Cons
- Good controls configuration. - Free download. - A very popular style of play. - Game speed.	- The map could be improved. - Some server failures. - The matchmaking is not so successful. - Hackers can appear in the games.
