

Review Monopoly

Short Circuit Game Studios

Become a real real estate tycoon with the mobile application of the board game Monopoly. Advance your board and get your city to regain its splendor by building all kinds of buildings and getting extra points by unlocking their mini-games. Enter the ranking of the best and win the game

Now you can become a millionaire in the classic **Monopoly!** Board games are slowly coming to mobile devices and the time has come for the most famous banker. It is an application that you will find available to **download** for **Android** and **iOS**, and its objective is the same as in its dashboard version, to be the richest and to make your city as splendid as it was before.

It works in a similar way as other games like Parcheesi Star or Scrabble do, with the difference that in the **Monopoly** application you are the one who customizes the rules of the games and you have mini-games with which you can make them more entertaining.

Monopoly has been one of the most popular board games on the market for over a century, sparking discussions between friends and families. Its way of playing is quite simple, select your token and progress through its board to build buildings that will make you richer as you earn more and more coins. You'll also meet cool characters, unlock special bonuses, and lots of special rewards.

The adaptation of **Monopoly** has been done with all the details, from the board, its streets, the jail and even the chips you play with are the same as the original ones. There is the classic car, the top hat and the iron. You just have to choose your favorite and start playing.

To advance through the famous board you have to complete missions to build your city and manage it being a true real estate genius. Go up in the general classification of the best managers in your **Tycoon Mode**. Among the constructions that you can create are the famous train stations, swimming pools, hotels, the classic power plants and everything you can imagine for your city.

Every day you will have luck cards that can change your luck in **Monopoly**, you will also have to explore what you already have built because you will find special tokens that are hidden by everyone. Go collecting all you discover and get the complete collection.

You will also get extra coins in **Monopoly** playing in its slot mode, in it you will discover a lot of mini-games in which you can get many extra points. It is completely free but it has a series of features that have their own price, but it is not compulsory to purchase to continue enjoying the game.

Once your city begins to grow, you have the possibility to hire people to help you manage all your properties, even hire private security for your buildings!

But if what you want is to play a game like always, you have the option to play **Monopoly** in its classic mode and challenge friends, with strangers from anywhere in the world or directly against the machine. One of the characteristics of the original was that the games could be endlessly long, and to start playing you needed a lot of time. With this application it is not necessary, it has a **fast game mode**, with which you can play casual games in which the maximum time is one hour and the end occurs when one of the players falls into bankruptcy.

One of the advantages of the **Monopoly** app is that you do not have to worry about who the bank is or watch that

none of the participants keep money that does not correspond to them, as happened in the physical. It is the game itself that sets the rules and who distributes the money.

There is no established way to beat **Monopoly**, everything will always depend on what the dice mark, but each player has their own strategy. There are some who try to buy as fast as possible and leave the rest with nothing. This means that when it comes to building they have advantages, because they can do it more easily. There are others who are cautious and gradually climb, buying what they see that will be really profitable. But in the end both types of buyers find the same situation, it is the luck of those who are marking their departure, although we can say that the clear winner is always the bank, which will never lose.

Pros	Cons
- You find the classic board game on your mobile. - You can challenge friends or strangers. - The details of the game are identical to the original. - Minigames make games more entertaining.	- Lots of publicity. - There are features that cost money. - In games with players from all over the world it does not load well. - Lots of pop-up advertising.
